Elephant Ears Plant Has Blooms

We have often seen elephant ear plants, in fact for several years there was a quite large one in the office of the **TIMES-VIRGINIAN**, but the one above in the house of Ernest Humbles near Oakville is the first one we've heard of that has blooms.

Shown in the photo above are Freddie Pennix, Evan Humbles, Catherine Pennix pointing to the blooms, Seottie Humbles, Nikki Pennix, and standing in back is Mrs. Ernest Humbles.

Appomattox County Library

by Verda Conner

May I introduce to you, Gentleman Johnny Burgoyne who was considered by some as one of the best of the British Generals of the Revolution. It has been said that the War of Independence was won by Washington and his troops in spite of Congress; the loss of the American Colonies was due, not so much to the incapacity of the British generals in the field as to the stupid bungling of affairs in London by Lord George Germain. The author of this book is F. J. Huddleston, Librarian of the British War Office at the time this was written in 1927. He says "of the British commanders who fought and lost in North America, none had a more variegated and romantic career than John Burgoyne. He was called Gentleman Johnny because above all he was a gentleman of the old school and even to his enemies he was always courteous and kind. The general opinion in England was that America would put up but a poor fight, however Charles Les said, "If I have any judgement, the people of New England are this day more calculated to form irrestible, conquering armies than any people on the face of the globe". Lee was later to betray the American cause and was court martialed. Students of early American history will find this book much to their liking.

Now that the baseball season is in, sports fans will be interested to know of a new book in the Library called The Sports Encyclopedia-Baseball by David S. Neft. It was donated by the Senior Class of 1965 in memory of Thomas Watkins Tolbert. It contains the facts and figures for every piece of action on the field since 1901. Every team, every player, every world series game and all the all-time leaders, batting, pitching, every player's vital statistics and lifetime totals and the full story of the game.

Another beautiful new book is called Flags Through the Ages and Across the World. It is a major survey of civilization from the perspective of the flag. It is also a story of great leaders such as Charlemagne, Genghis Kahn, Ivan the Terrible and Mahatma Gandhi - about Columbus and those who came after him to settle the New World and fight for its independence.

If you hear your children talking about the metric system and know as little about it as most of us do, you will want to check out the book entitled Let's Talk About the Metric System. Things are changing and within the next 10 years of so, we may be using this system and instead of the commonly used words, inch, foot, yard, mile, quart, and pound, we may be saying such things as kilometer, liter and kilogram, etc. You may ask why we should change. It seems there is a very good reason. Since foreigh trade and travel are becoming more important in our lives, it is necessary that we know how to communicate with our overseas neighbors, If we want to import foreign cars we will have to use metric tools so that our mechanics can fix them when they break down. According to the foreword in the book by Joyce Lamm, we are not as ignorant of this system as some people think. Everyone who has studied science has used the Metric System in his experiments and all our drug store prescriptions use metric units. But just in case you know little about it, this book is an excellent one for beginners.
